

G4UserSteppingAction

```
classDiagram
    class G4UserSteppingAction
    class EMMASteppingAction {
        +EMMASteppingAction()
        +~EMMASteppingAction()
        +UserSteppingAction()
        +getDeadInt()
        +getDead()
    }
    G4UserSteppingAction <|-- EMMASteppingAction
```

The diagram shows two class boxes. The top box is for G4UserSteppingAction and is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. The bottom box is for EMMASteppingAction and is divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains a list of methods. A blue arrow with an open triangular head points from the top of the EMMASteppingAction box to the bottom of the G4UserSteppingAction box, indicating inheritance.

EMMASteppingAction

- + EMMASteppingAction()
- + ~EMMASteppingAction()
- + UserSteppingAction()
- + getDeadInt()
- + getDead()
